## Enterprise Search Technology

Our client is a world leader in Content Management and Enterprise Search Technology with products used by the world's best known companies with the most demanding information needs.

**We are looking for software professionals who are ready to take on the challenge of building and sustaining complex search engine applications at our state-of-the-art Research and Development Centre in Colombo.**

### Senior Software Engineers - C++ or C#

You hold a degree in Computer Science or equivalent and have more than four years of experience in software development and maintenance of large scale distributed systems.

You have an excellent knowledge of C++ or C# with extensive industry experience in development and debugging, along with Object Oriented Design skills.

Knowledge of Design Patterns, as well as experience of distributed systems and large scale data processing will be a distinct advantage.

You have excellent communication skills, the ability to proactively identify issues and provide solutions in a globally distributed development environment, and are able to provide technical leadership to a group of Software Engineers.

**Note: Candidates with less than four years of experience in either C# or C++ will NOT be considered for this role.**

### Technical Lead - .NET Technology

You hold a degree in Computer Science, and have more than five years experience in software development with at least two years in a Development Lead or Technical Management capacity responsible for project planning and estimation.

You have an excellent knowledge of core C# including Microsoft development tools and technologies and comprehensive experience in Object Oriented Design and Development. Experience in C++ will be an advantage.

Experience in distributed systems and large scale data processing, and knowledge in the Scrum Agile Methodology will be a distinct advantage.

You have excellent communication skills and enjoy the challenge of leading a team of Software Engineers in meeting tight deadlines while coordinating work internationally.

**Note: Candidates with less than five years of experience will NOT be considered for this role.**

Comprehensive training in Enterprise Search Technology and building search applications will be provided.

All applicants should be team players and be willing to travel overseas from time to time.

Kindly email your CV to [cst.hr@cslworld.com](mailto:cst.hr@cslworld.com) indicating the position applied for in the Header of the email against Subject, by 05th November 2011.

Creative Solutions is a dynamic, fast growing software development company with customers in the USA, UK, Sweden, Norway and Australia.

We work together with international software companies contributing and adding value to their Research & Development activities.

We commenced operations in 2001 and are always on the lookout for talented and highly motivated individuals. Creative Solutions offers rapid career development, challenging work and international exposure, in a creative and informal work environment.

We are currently working on projects using technologies such as Microsoft .Net, C++, J2EE, J2ME, and different databases.
