

# Get what you want

Here are the seven keys to help you get what you want out of life;

- Recognize that you are the source of everything that you want.

Stop waiting to inherit it, win it; marry it, or expecting it to come from any source other than you. You can have anything that you want, all it requires is working with your thoughts, feelings and intentions.

- Understand that the process of attaining what you want (the how) is more important than the end result (the what).

It's really a matter of personal growth, changing your thinking and expanding your beliefs about what you deserve to have. Once you have mastered the how, you can have what you want when you want it. It is the old adage about teaching a man to fish in order to feed him for a lifetime.

- Don't underestimate the power of your thoughts, emotions and intentions

Your thoughts are the model of what you want. Everything that was invented in this world began as a thought in someone's

mind first. Emotions energize thoughts. The more passionately you want something, the more rapidly you bring your thoughts into form. Intention acts to direct your thoughts and emotions. The clearer you are as to your purpose or intention the more likely you are to get what you want.

- Think about what you do want as opposed to what you don't want.

I want a loving relationship is a far cry from; I don't want to be alone for the rest of my life. I want an abundant life is not the same as; I don't want to be poor. I want to be healthy is not I'm tired of being fat. Your thoughts form the model of what you want. Whatever you focus on is what you are likely to receive, as your energy follows your thoughts. If you

focus on what you don't want, that is exactly what you will end up attracting into your life. We work perfectly to produce the results that we are getting, so choose to intentionally program the results that you really want.

- Ask yourself what you think, having what you want, will give you that you don't have now.

If you had more money, or a relationship or children or a better job, or were thinner; what needs or desires would be satisfied? Usually the underlying answer to this ques-

tion is something like security, freedom, love, happiness or inner peace. Dig down until you get right to the essence or core of what you really want in your life.

- Determine ways that you can bring the essence of what you want into your life right now.

Don't wait to get what you want, how can you be happier, more secure, have more love or inner peace right now? Ask yourself what it would take to feel and believe these things now. If you think that being thinner would attract more love into your life, how

can you attract more love now? Perhaps you can be more loving towards family, friends, people in need in your community. Perhaps you can start by loving, nurturing and pampering yourself more.

- Act like you already have what you want in your life.
